								LHIN to improve access to a	This has been an ongoing issue in our community for years and a strategy if needed to address this gap in access. Ongoing negotiations with the LHIN, the MOH and our LTC and community partners is essential	Number of acute care beds occupied by ALC patients over the number of acute care beds	30% or less acute care beds will be occupied by patients who have been designated ALC.	This in a chronic ongoing challenge in the Northwest and nothing substantial has been done to address it. Our aging population suggests that this problem will only get worse if reliable access to LTC is not addressed.
Timely	Percentage of patients discharged from hospital for which discharge summaries are delivered to primary care provider within 48 hours of patient's discharge from hospital.	% / Discharged patients	Hospital collected data / Most recent 3 month period	826*	26.36	35.00	Because this is a new indicator we feel that this benchmark is reasonable while we refine our processes	Provider to include	Completed Discharge Summaries will be sent to the Primary Care Practitioner within 48 hours of Discharge. This practice will be monitored by the Manager of Health Records Present data to Medical staff and MAC through the GP Extender group quarterly	We will measure the number of Discharge summaries that are sent to the Primary Care practitioners over the number of discharges. Results to be reported to the Quality Committee of the Board Quarterly	35% of Discharge summaries will be sent to the Primary Care Practitioner within 48 hr.	This is a new indicator
	The time interval M between the A Disposition N Date/Time (as determined by the main service T provider) and the O Date/Time Patient R Left Emergency Pepartment (ED) for admission to an inpatient bed or operating room.	Hours / All patients	CIHI NACRS / October 2018 – December 2018	826*	4.6	4.60	We are well below the provincial average (26.2 hours Dec 2018 - cumulative over 9 months)	to move patient's out of	Continue to monitor patient's who have not been moved to an inpatient bed within 4.6 hours to determine any mitigating factors Utilization to meet with inpatient units daily to identify potential discharges	within 4.6 hours of the decision to admit. This data is reported at Utilization Committee and sent monthly to ER manager	Percentage of ER patients who have and order to admit will be in an inpatient bed within 4.6 hr over total number of patients who have an order to admit from ER	inpatient bed is very low and we will endeavor to maintain this benchmark. The provincial benchmark for

											3)Discharge time is posted in patient rooms and in patient handbook and an agreement is in place with Hostel on site to allow patients to wait for transportation once discharged	Patient's who are discharged will leave their beds by 1000 hours	Number of patients discharge beds that are available for admissions by 1000 over the number of discharges	new admissions by 1000	large patient
Theme II: Service Excellence Patie	Patient-centred	Percentage of complaints acknowledged to the individual who made a complaint within five business days	9	% / All patients	Local data collection / Most recent 12 month period	:	92		Timely response to complaints is essential to good patient care. We currently perform at a very high level. However, we implemented a new reporting system (RL6) in August of 2018 so our baseline data is based on only 6 months data. Our performance over the next year will be our true test of quality.	practice in formal acknowledgement of complainants within business days. Educa appropriate staff on inclusion and exclusicriteria Create an ale our RL6 reporting systemind the appropriperson on the 4th datacknowledgement his been documented. Uthe patient handboo include the patient's receive acknowledge re their complaint with business days	acknowledgement of complainants within 5 business days. Educate appropriate staff on inclusion and exclusion criteria Create an alert in our RL6 reporting system to remind the appropriate staff person on the 4th day if an acknowledgement has not been documented. Update the patient's right to receive acknowledgement receive acknowledgement re their complaint within 5 business days	monitored by the Quality/Risk Manager and/or the RL6 administrator(s) All managers will be educated in the process of	Percentage of complaints that received acknowledgement within 5 business days over total number of complaints will be reported to the Quality committee of the board quarterly Same will be reported to the Patient/Family Advisory committee quarterly Number of complaints received through RL6 that have	received and documented in RL6 will be acknowledged within 5 business days	Our baseline is based on 6 months data since implementation of RL6. A large percentage of complaints are made in person or by telephone so are acknowledged at the time the complaint is received and the interview is done by the person receiving the complaint.
											on inclusion and exclusion criteria	acknowledgement of complaints and the inclusion and exclusion criteria and will be responsible to monitor complaints in their area through RL6 to ensure that the complainant receives acknowledgement within 5 business days.	been acknowledged within 5 business days over the total number of complaints.	received through RL6 will be acknowledged within 5 business days	
		Percentage of respondents who responded positively to the following question: Did you receive enough information from hospital staff about what to do if you were worried about your condition or treatment after you left the hospital?		% / Survey espondents	CIHI CPES / Most recent consecutive 12- month period	826*	59.77	70.00	We have begun to now offer our Patient Experience survey on line so hope to get better response. This is a stretch goal		1)Have recently launched and electronic version of our Patient Experience Survey to enhance the existing paper survey format Supervisors continue to do follow up phone calls to patients who indicate consent to receive such calls Review and revise current discharge instruction document which is given to the patient	Monitor number of patients indicating on follow-up survey that they had enough information about what to do after discharge if you are concerned over all surveys returned.	Percentage of patients indicating a positive response in the Patient Experience Survey over the total number of surveys returned will be reported the the Quality Committee of the Board and the Patient /Family Advisory committee biannually.
